

Leaked Credentials & Darknet Monitoring

Secutec SecureSIGHT

Prevent now, secure tomorrow

Shine a light on the darknet with our 24/7 managed darknet monitoring service

Credential leakage monitoring is a critical cybersecurity practice where we continuously monitor for instances where an organization's usernames and passwords, encompassing both internal employees and third-party entities, have been exposed or compromised. This monitoring is essential for several reasons:

Protection against **unauthorized access**

Mitigating **account takeover attacks**

Protect **customer data and sensitive information**

Expose **sleeping accounts**

Fulfill industry **compliance** and maintain **trust**

Third-party and supply chain **risk monitoring**

Our **darknet scans** help organizations to protect their sensitive information, maintain compliance, and mitigate the risks associated with credential exposure. It is a **proactive measure to safeguard against emerging threats, unauthorized access and data leaks** in an increasingly interconnected and digital world. Our approach involves **active filtering** through the darknet's vast expanse, seeking out crucial information such as company and domain names, brands, VP's, C-level employee names, specific keywords, and discernible patterns. Our **automated scans** operate around the clock and are supported by an extensive repository of threat intelligence data.

Armed with these insights, you gain a **comprehensive view of your organization's risk profile** allowing you to efficiently prioritize and remediate potential risks quickly.

Did you know that in 2023...

- 1 343 million total exposed credentials were recovered from the darknet
- 2 90% of surveyed organizations reported an identity-related breach
- 3 74% of users involved in breaches reused previously exposed passwords

How we protect you

Immediate Alerting

When potential credential exposures are detected.

Identification Of Infected Employees

Receive all information on compromised credentials, the source of the leak and potential impact.

Instant Reporting Of Malicious Activities

To prevent breaches and data leaks that can put your organization at risk.

Continuously patrolling your digital perimeter

Secutec SecureSIGHT's **managed service** offers the most cost-efficient solution that covers the most crucial aspects of a cyber attack's life cycle by analyzing a wide range of attack vectors and indicators of compromise. The **Secutec Security Operations Center (SOC)** collects all data about possible attacks, adds context to alerts and provides you with actionable data and interpreted insights.

Leveraging your current security infrastructure, Secutec SecureSIGHT presents **11 different modules** tailored to your specific requirements.

MySecutec | Take control of your cybersecurity

The MySecutec portal allows you to be more engaged with the security results of your organization. It offers a **clean, intuitive dashboard** that brings together **all essential security data in one place** such as assets, reports, threats, and accepted risks.

With actionable insights, you can quickly identify, prioritize and address the most critical vulnerabilities, track asset risk levels, and follow up on threats with built-in notes, filters, and export options. Real-time alerts for critical threats are delivered via email, ensuring you're always informed and able to act immediately.

Your central security hub, always at hand

The MySecutec App gives you **real-time access** to your cybersecurity posture - wherever you are.

With the app you can:

- Instantly access your cybersecurity data
- receive real-time alerts for critical vulnerabilities
- track your security score, threats, and risks live
- effortlessly monitor and manage credential breaches
